ABOUT WOODWARD

Woodward is an independent designer, manufacturer, and service provider of control solutions for the aerospace and industrial markets. Our aerospace systems and components optimize the performance of fixed wing and rotorcraft platforms in commercial, business and military aircraft, ground vehicles and other equipment.

Our industrial related systems and components enhance the performance of industrial gas and steam turbines, reciprocating engines, compressors, wind turbines, electrical grids and other energy related industrial equipments. The company's innovative fluid energy, combustion control, electrical energy, and motion control systems help customers offer cleaner, more reliable and more efficient equipment. Our customers include leading original equipment manufacturers and end users of their products.

We are Global

GENSET CONTROLLERS

The easYgen-3000 XT Series is an exceptionally versatile genset control and protection package with all the flexibility and features needed to fit a wide range of power generation applications. It allows the user to standardize on a single, affordable control for many uses – from standalone emergency generators to isochronous parallel operation of up to 32 gensets. Common applications include emergency standby, cogeneration, marine ship/shore power, island prime power or utility paralleling with peak shaving, and import/export control. The easYgen-3000XT controls are backwards compatible to easYgen-3000 series controls so they can synchronize, load share, and perform load-dependent start/stop as needed.

The easYgen-2000 Series is a compact, affordable genset control and protection package for load sharing up to 16 gensets in island operation, or parallel operation of a single unit with a utility. Its integrated load-dependent start/stop programming allows you to define how gensets are brought on- and off-line to support changing load demands. It even works with a mix of different sized engines, so you can maintain the spinning reserve you need while optimizing fuel efficiency.

The innovative features of the **easYgen-1000**, including auto start-stop logic, real and reactive power sensing, and automatic transfer switch capability make it the intelligent choice for specialized mobile power and emergency stand-by applications. Advanced CAN communication provides control of most common engine ECUs and allows connection to the I/O expansion module. Available in a compact version and an advanced version with state-of-the-art features, the easYgen-1000 controls are smart choices for serial critical stand-by genset production.

The easYgen-100 Series is an affordable, value-packed genset control for auto start/stop operations. It provides all the essential functionality for standby diesel/gas genset application with monitoring, protetion and event recording functions common to higher end controls. Available in a compact version and an advanced version with state-of-the-art features, the easYgen-100 controls are smart choices for serial standby genset production.

[&]quot;The easYgen-3500/L55 communication system allows up to 48 members on the bus. If the easYgen count is reduced from 32, the L5-5 count can be increased (up to 32)

2 CAN#2 freely selectable during configuration between CANopen or J1939

1 It is possible to toggle between CAN and Ethernet load share line in STOP mode ("warm redundancy")

4 Selectable senders: VDO (0 to 180 Ohm, 0 to 5 bar), VDO (0 to 180 Ohm, 0 to 10 bar), VDO (0 to 380 Ohm, 40 to 120°C), VDO (0 to 380 Ohm, 50 to 150°C), Pt100, Pt1000, resistive input (one- or two-pole, 2pt. linear or 9pt. user defined)

5 Low temperature display variants available (-40 deg. c to 70 deg. c)

RELATED DEVICES

RELATED DEVICES

The LS-5x1/5x2 circuit breaker control and protection device is designed to enable complex power management applications with multiple segments and bus breakers in combination with easYgen-3400XT/3500XT-equipped genset controllers. The LS-5 devices manage synchronization, loading and unloading on each bus segment, and send the required voltage and frequency references via CAN bus to the easYgen-3400XT/3500XT genset controllers. It can be used as a sync-check relay in stand-alone mode without easYgens.

Woodward's **RP-3000XT** is a touch screen remote control and annunciation panel for use with the easYgen-3000XT series controls. It is particularly useful with the back panel mounted easYgen-3100XT/3400XT, providing control from the front panel with greatly reduced wiring to the access door, while keeping high voltage connections located safely on the back panel.

The **easYlite-100** is designed to remotely display the status of a generator control system through a CAN BUS Interface. The easYlite-100 may be used where an additional status display is required, which is directly controlled by the generator control unit e.g. NFPA-110 compliant applications.

The **IKD 1** is an I/O expansion board. It allows an additional eight discrete inputs and eight relay outputs to be connected via CAN bus to the Woodward easYgen series generator set controllers and DTSC-200 automatic transfer switch controllers. It is possible to connect multiple IKD 1 cards. The I/O are displayed in clear text messages on the control's HMI and can be used for further processing.

The **Load Share Gateway (LSG)** is a communication converter specifically designed to operate the easYgen-2000 / easYgen-3000XT Series and any other industrial legacy devices in a load share and enables retrofit applications.

SYNCHRONIZERS & LOAD SHARE CONTROLLERS

The **DSLC-2 control** is a microprocessor-based synchronizer and load control designed for use on three-phase AC generators. The DSLC-2 control combines synchronizer, load sensor, load control, dead bus closing system, var, power factor and process control, all integrated into one powerful package. Applications allow up to 32 generators to be precisely paralleled and controlled. A dedicated Ethernet system provides seamless communications between DSLC-2 and MSLC-2 units. A second Ethernet port is provided for redundant load sharing or customer remote control and monitoring capability using Modbus TCP allowing easy DCS and PLC interfacing.

Modbus RTU is available through a separate RS-485 port.

The MSLC-2 control is a microprocessor-based load control designed for three-phase electric power generation sites equipped with the DSLC-2 digital synchronizer and load control. The original MSLC has been blended with another decade of application experiences to develop the new MSLC-2. The MSLC-2 is a synchronizer, a utility load sensor, an import/export load level control, a power factor control, and a master process control. Applications include power systems which operate in parallel with the utility with single or multiple utility feeds as well as new capabilities for multiple segment and intertie breaker control.

The **SPM-D2-10 Series** are microprocessor-based synchronizers designed for use on threephase AC generators equipped with Woodward or other compatible speed controls and automatic voltage regulators. The SPM-D2-10 Series synchronizers provide automatic frequency, phase, and voltage matching using either analog or discrete output bias signals.

DTSC-200 | DTSC-50

FEATURE OVERVIEW

From the

AUTOMATIC TRANSFER SWITCH CONTROLLERS

The **DTSC-200** is the ultimate control for new ATS (automatic transfer switch) builds and retrofits. A complete measurement and protection package, it easily configures to utility-to-generator, generator-to-generator, or utility-to-utility systems for open-, delayed- or closed transition transfer with sync-check to ensure the smoothest possible transfer.

The **DTSC-50** digital transfer switch controller is an economical controller for open-transition (break before make) automatic transfer switch (ATS) control for emergency standby applications with a single generator.

PROTECTION RELAYS

With the **HighPROTEC** Line Woodward offers an outstanding solution for the reliable protection of distribution and generator applications. The innovative device handling and PC tool with plausibility check and internal fault simulator, combined with high flexible hardware, minimized commissioning, training costs and setting failures. The menu overview can be optimized by hiding not relevant functions. The line is easily applicable for generator, cable and line, and transformer differential protection, directional and non-directional feeder protection as well as motor protection. The all-in-one protection concept for various applications guarantees a high availability of your electrical equipment and your grid.

The **High Tech Line** consists of modular protection devices for low voltage, medium voltage, and lower high voltage level with numerous and complex protection functions. The protection range includes basic time-overcurrent protection, machine protection to high-grade differential protection. Auxiliary relays are available for lockout, trip circuit supervision and rotor earth fault detection. Devices are designed for door mounting, either in separate housings or in 19" racks. For back panel mounting an adapter is also available.

The **Professional Line** with its digital separate or combined relays provide all common protection functions for low and medium voltage applications, and are designed for DIN rail mounting. Rated voltage and frequency can be set by means of DIP switches; pick-up values and tripping delays via potentiometers. The wide-range power supply for AC and DC make the relays universal. An optionally available interface adapter enables the devices to communicate with the *Smart view* PC operating software.

The **Basic Line** devices are supervision relays for low voltage applications equipped with a precise micro-controller and designed for DIN-rail mounting. They are easy to operate and simple to commission.

Advance technology at low price.

All **WI Line** devices are self-powered time overcurrent relays, which means they take their energy from the current transformers. Since they do not require auxilliary power, the WI Line relays are well suited for use in self-sustaining transfer and distribution stations, local grids, and ring-main-units.

Tripping characteristics range from two-stage, independent (DEFT) and dependent (INV) time-overcurrent protection, up to special characteristic curves. As further options, we offer some relays with integrated earth fault protection.

¹ = Within every communication option only one communication protocol is usable.

Smart view can be used in parallel via the Ethernet interface (RJ45).

ANSI: 46, 48, 49M, 49R, 49S, 50J, 37, 50, 51, 51LRS, 51LR, 50N, 51N, 60L, 66, 86, 50BF, 74TC

The parameterizing and disturbance analyzing Software Smart view is included in delivery of HighPROTEC devices.

Communication cable USB Type mini-B required (part number 5450-1946).

With control function for 1 switchgear and logic up to 80 equations.

Optional: Remote temperature detection box is available on request (up to 12 sensors)

		MRL1			
Rated voltage	24 V/DC	operating range	18-32 V	24	
	48 V/DC		30-60 V	48	
	110 V/DC		66-150 V	110	
	220V/DC		150-300 V	220	
Housing (12 TE)		19"-rack			Α
		Flush mounting			D

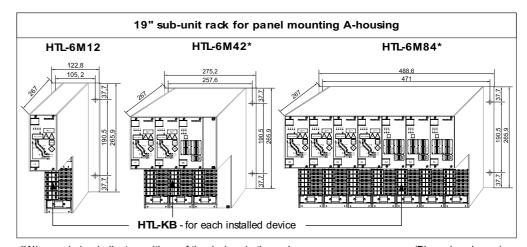

MRA1 Trip Circuit Supervision

	MRA1	D
Housing (12 TE)	Flush mounting	

MRT1 Test Unit

	MRT1	
Test insert individual		Т
- appertaining plastic housing with plug block for door installation		BD

*When ordering indicate positions of the devices in the rack

(Dimensions in mm)

Protection Relays

HTLTF Partial Space Front Plate 3HE

	HTLTF	
For plug-in positions not used	partial front plate 6TE, 3HE (width like ½ MRI)	06
	partial front plate 12TE, 3HE (width like 1 MRI)	12

HTLAB HTL Contact Block Cover

	HTLAB
Protection against finger access for HTL A and	B terminals

HTL3M12 19" Rack System for Back Panel Mounting

	HTL3M12
Cable entry lateral, 3HE	

HTL6M12 19" Rack System for Back Panel Mounting

Note: When ordering 6M versions, include one HTL-KB for each installed device in the order!

	HTL6M12
Connection from the front	
Module width 12TE (= e.g. 1 MRI1)	

HTLKB Additional Contact Block for HTL-6M-Housing

Additional contact block with cable tree for measuring inputs and contact outputs, required for every installed relay, fits all High Tech Line relays with 12 TE

HTL/PL SOFT Diagnosis and Setting Software for HTL/PL Devices (German/English)

Nearly (just a few have not yet been integrated) all HighTechLine protection can already set with "Smart view". Those relays need to be set by HTLPL-Soft.

EASYPROTEC		
	100 Vac ¹	8441-1160
	690 Vac	8441-1161

¹ Adjustable to 120 Vac

The easYprotec series is an industrial grade low voltage protection relay that offers voltage and frequency protection features in a single package. Using advanced true RMS measuring the easYprotec offers a high measuring accuracy regardless of harmonics, transients, or disturbing pulses. This is suitable for generator or mains protection.

ACCESSORIES

ACCESSORIES & SERVICES

Woodward provides various high quality accessories dedicated to your application.

Highly qualified staff members in our international offices guarantee customer service at the highest level worldwide. They give information on warranties, downtimes, spare parts, repairs, orders and technical training.

Apart from quality, there are growing expectations in terms of customer care. Maximum availability and operational reliability rank first in the requirements catalogue.

Woodward provides maximum service support worldwide.

WEIGHT AND DIMENSIONS

Unit	Description		Page	
	2 222. (\$1.2.)	Weight (g)	Unit incl. package Dimension WxHxD (mm)	
actiVgen	Electronic engine speed controller	540	149 x 52 x 153	18
Asynchron KIT-2000	Genset controller + EPU-100 for asynchron applications	1.100	219 x 171 x 61	15
Asynchron KIT-3000	Genset controller + EPU-100 for asynchron applications	1.850	282 x 217 x 99	14
BF1	Frequency relay	500	145 x 100 x 110	60
BL18	Power supply and battery charging unit	2.000	145 x 100 x 110	70
BL20400	Power supply and battery charging unit; 400 V	4.000	145 x 100 x 110	70
BN1400	Mains decoupling relay	500	145 x 100 x 110	60
BU1AC	AC voltage relay	500	145 x 100 x 110	60
BU1DC2	DC voltage relay	500	145 x 100 x 110	60
BUA1	Voltage and voltage balance relay	500	145 x 100 x 110	60
COMRS232Nullm	RS232 zero modem cable with Handshake (3 m)		1	41/69
DSLC-2	Digital synchronizer and load control	1.900	250 x 227 x 84	20
DTSC-50	Automatic transfer switch controller	450	158 x 158 x 40	24
DTSC-200	Automatic transfer switch controller	800	219 x 171 x 61	24
easYgen-300	Genset controller for standard solutions	450	158 x 158 x 40	15
easYgen-400	Genset controller for standard solutions	320	135 x 110 x 44	15
easYgen-600	Genset controller for standard solutions	850	209 x 166 x 45	15
easYgen-800	Genset controller for standard solutions	850	237 x 172 x 45	15
easYgen-1400	Genset controller for single unit operations	320	135 x 110 x 44	15
easYgen-1500	Genset controller for single unit operations	800	219 x 171 x 61	15
easYgen-1600	Genset controller for single unit operations	850	209 x 166 x 45	15
easYgen-1700	Genset controller for single unit operations	850	237 x 172 x 45	15
easYgen-1800	Genset controller for single unit operations	850	237 x 172 x 45	15
easYgen-2200	Genset controller for multiple unit operations -	800	219 x 171 x 61	15
00018011 2200	plastic housing with display	000		10
easYgen-2300	Genset controller for multiple unit operations - plastic housing with display	800	219 x 171 x 61	15
easYgen-2500	Genset controller for multiple unit operations - plastic housing with display	1.100	219 x 171 x 98	15
easYgen-3200XT P1	Genset controller for multiple unit operation - plastic housing with display	1.850	282 x 217 x 99	14
easYgen-3200 P1	Genset controller for multiple unit operation - plastic housing with display	1.850	282 x 217 x 99	14
easYgen-3200 P2	Genset controller for multiple unit operation - plastic housing with display	2.170	282 x 217 x 99	14
easYgen-3100 P1	Genset controller for multiple unit operation - metal housing	1.750	250 x 227 x 84	14
easYgen-3100 P2	Genset controller for multiple unit operation - metal housing	2.270	250 x 227 x 84	14
easYgen-3400XT	Genset controller for complex breaker application – metal housing	1.750	250 x 228 x 84	14
easYgen-3400	Genset controller for complex breaker application – metal housing	1.750	282 x 217 x 99	14
easYgen-3500XT	Genset controller for complex breaker application – plastic housing with display	1.850	282 x 216 x 96	14
easYgen-3500	Genset controller for complex breaker application – plastic housing with display	1.850	250 x 227 x 84	14
easYlite-100	Remote annunciator	300	158 x 158 x 40	18
easYprotec	Low voltage protection relay	300	146 x 128 x 50	65
EPU-100	Remanence voltage converter for asynchronous generators		30 x 55 x 75	67
GC-3000XT	Genset controller for complex application	1.750	250 x 228 x 50	14
HTLAB	HTL contact block cover		1	52
HTL/PLSOFT4	Diagnosis and setting software for HTL/PL-devices (German/English)		CD-ROM	53/59

¹ Device in lined ESD foil

Unit	Description		Page	
		Weight (g)	Dimension WxHxD (mm)	
HTL3M12	19" rack system for back panel mounting		1	52
ITL6M	19" rack system for back panel mounting		1	52
ITLKB	Additional contact block for HTL-6M-housing		1	53
ITLTF	Partial space front plate 3HE		1	52
(D 1	Digital I/O Expansion Board	360	168 x 128 x 51	67
RI1	Earth fault relay	2.000	315 x 175 x 140	53
RU1	AC voltage relay	2.000	315 x 175 x 140	53
S-5	Circuit breaker control and protection	840	219 x 171 x 61	17
SG	Load Share Gateway	280	141 x 98,5 x 21	18
ЛСА4	Directional feeder protection	4.000	250 x 240 x 200	30
1CDGV4	Generator differential protection	4.500	250 x 240 x 200	38
1CDLV4	Line Differential Protection	4.500	250 x 240 x 200	39
1CDTV4	Directional transformer differential protection	4.500	250 x 240 x 200	35
MRA1	Trip circuit supervision	2.000	315 x 175 x 140	50
1RA4	Directional feeder protection	4.000	250 x 240 x 200	31
1RDT4	Non-directional transformer differential protection	4.000	250 x 240 x 200	34
IRF3	Frequency relay	2.000	315 x 175 x 140	47
MRG3	Generator protection relay	2.000	315 x 175 x 140	46
MRI1_D	Time overcurrent relay with multi-characteristic	2.000	315 x 175 x 140	46
MRI1_U	Voltage controlled time overcurrent relay	2.000	315 x 175 x 140	46
MRI3I_C	Time overcurrent-/earth fault relay with control function	2.000	315 x 175 x 140	43
MRI3I_H	Time overcurrent-/earth fault relay with harmonic	2.000	315 x 175 x 140	44
////OI_//	stabilizing	2.000	010 X 170 X 110	
/IRI3I_E/X	Time overcurrent-/earth fault relay	2.000	315 x 175 x 140	44
MRI3I_T	Time overcurrent-/earth fault relay with thermal	2.000	315 x 175 x 140	44
//RI4	Combined time overcurrent and earth fault relay	2.900	250 x 150 x 200	32
MRIK3I_C	Time overcurrent-/earth fault relay with auto reclosing	2.000	315 x 175 x 140	45
WININGI_C	function	2.000	313 X 173 X 140	73
MRIK3I_E	Time overcurrent-/earth fault relay with auto reclosing	2.000	315 x 175 x 140	45
/II/II/JI_L	and control function	2.000	313 x 173 x 140	43
//RI3LE	Earth fault relay	2.000	315 x 175 x 140	44
MRL1		2.000	315 x 175 x 140	50
MRM3	Lock-out relay	2.000	315 x 175 x 140	49
	Motor protection relay	2.900		36
MRM4	Motor protection relay	4.000	250 x 150 x 200	37
MRMV4	Motor protection relay with voltage and frequency		250 x 240 x 200	
MRN3	Mains decoupling relay	2.000	315 x 175 x 140	47
IRP2	Directional power relay	2.000	315 x 175 x 140	48
MRQ1	Field failure relay	2.000	315 x 175 x 140	48
MRR1	Rotor earth fault relay	2.000	315 x 175 x 140	49
MRS1	Negative Sequence Relay	2.000	315 x 175 x 140	48
MRT1	Test unit	2.000	315 x 175 x 140	50
/RU3	AC voltage relay	2.000	315 x 175 x 140	47
1RU4	Voltage and Frequency supervision	2.400	250 x 150 x 200	33
ISLC-2	Master Synchronizer and Load Control	1.900	250 x 227 x 84	20
RP-3000/-3000XT	Remote Panel	2.800	365 x 305 x 120	14
RSC2485USB1	Interface converter (for top rail mounting)	300	160 x 130 x 65	69
S485232 ADAPTER	Interface converter (for maintenance purposes)	300	1	69
D14 D0	0 1 :	222	1// 70 100	
PM-D2	Synchronizer	800	144 x 72 x 122	21
ISB2RS232ADAP	Interface converter (USB to RS232)		130 x 155 x 70	69
VI1SZ	Flag indicator	200	130 x 60 x 60	63
VIB1	Multi characteristic time overcurrent relay	700	200 x 155 x 80	63
VIC1	Multi characteristic time overcurrent relay	700	200 x 155 x 80	64
VIP1	Self-powered multi characteristic time overcurrent relay	1.900	260 x 145 x 110	63
VIP1BAT1	3.6 V spare battery		1	63
VIP1BAT2	3.0 V spare battery		1	63
VIP1PS	230 V/AC voltage supply	300	145 x 100 x 110	63
WISOFT				69

¹ Device in lined ESD foil

WEIGHT AND DIMENSIONS

Unit	Description		Page	
		Weight (g)	Dimension WxHxD (mm)]
XD1	Differential protection relay	1.800	260 x 145 x 110	59
XE2	DC current relay (loss-of-excitation relay)	500	145 x 100 x 110	58
XF2	Frequency relay 50/60 Hz	500	145 x 100 x 110	58
XG2	Generator-/Mains monitor	500	145 x 100 x 110	58
XI1E	Earth fault relay	500	145 x 100 x 110	55
XI1I	Time overcurrent relay	500	145 x 100 x 110	55
XM1	Motor protection relay	500	145 x 100 x 110	58
XN2	Mains decoupling relay	500	145 x 100 x 110	56
XP2R	Power and reverse power relay	500	145 x 100 x 110	58
XR1	Rotor earth fault relay	500	145 x 100 x 110	58
XRI1I_E	Combined time overcurrent- and earth current relay	1.800	260 x 145 x 110	56
XRI1E/X	Directional earth fault current relay)	1.800	260 x 145 x 110	56
XRI1I_R	Directional time overcurrent relay	1.800	260 x 145 x 110	56
XRN2	Mains decoupling relay	1.800	260 x 145 x 110	57
XRS1	Interface adapter RS485	200	1	59
XRW1	Mains decoupling relay for wind power systems	1.800	260 x 145 x 110	57
XS2	Negative sequence relay	500	145 x 100 x 110	58
XU1DC	DC voltage relay	500	145 x 100 x 110	57
XU1E	Earth fault voltage relay		145 x 100 x 110	58
XU2AC	AC voltage relay 50/60 Hz	500	145 x 100 x 110	57
XUA1	AC voltage and phase balance relay	500	145 x 100 x 110	57
XUF2	AC voltage and frequency relay 50/60 Hz	500	145 x 100 x 110	57
